Sandstone formation

Worthy companion to the Sangre de Cristo Mountains, Great Sand Dunes National Monument evokes its own ever-changing majesty as it blankets an area

*of 50 square
miles as high*

and built a refinery to extract shale oil. The 650-million-dollar investment is partly offset by a contract with the government to provide oil for defense use. Union may learn much that will help make shale viable—someday.

THERE'S A CAFE in Maybell and a gas station where you can fill up. In far northwest Colorado these are amenities not to be lightly regarded. And

between Maybell and the Utah line, 62 miles on Highway 318, there's not much else.

I took that road to the northern end of Dinosaur National Monument and camped by the Green River. This is a few miles downriver from Browns Park, where Butch Cassidy and his gang sometimes hid when not robbing banks. Blessed with abundant grass, Browns Park also was a gathering place for Indians. In the late 1830s it held a

them as having "an appearance like that of the discs of a broken wheel."*

small fur trading post, Fort Davis. Crockett
Park ranger Gilade Ross wondered where
the short-lived fort stood and at last found
evidence beside the Green. He picked up
charcoal, chunks of lead, and iron. He said
that trapper traded to Indians on the

"PI show you where it was," Adams
offered. Soon we were slipping behind the

found Gilade reported the location of the

"Sometimes you can still find a bead," he
said. Then "I think I see one." A tiny bead of
iron winked at us amid the gravel.

Gilade slipped off his shirt and, with one
arm on a rock, splashed into the water. The
exposed bottom of the bundle was just be-
hind him. He held it out in the di-
rect light. "That's Colorado for you," a
man's voice called from the
shore.
